

# Cell Cycle Flip Books

Name \_\_\_\_\_

You will complete each page to illustrate the changes that take place in a cell during cell division. Use the first box as your title page. (Be sure to put your name on it!) The pages with **bold** titles should show the location of the organelles at "the height" of that stage. Use the extra ovals to show the movement of organelles. Once you have completed the diagrams, carefully cut out each page, organize from first to last, and bind your book as directed by your teacher. Flip through your book to view cell division!
